Tailored EDI and Connectivity Solutions for Your Business

Setting up EDI and other data exchanges with customers is a cost of doing business. It's also an opportunity to make the most of your connections.
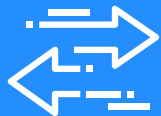

The largest shippers, brokers, and carriers account for nearly all EDI traffic. Yet small companies can enjoy the same benefits. Tranztec makes connecting with customers affordable and as easy as 1-2-3:

1 No TMS? No IT department? No problem. Tranztec's fully hosted connectivity solution includes data translation, mapping, and transmission. Tranztec's simple web interface lets you connect with customers by accepting or rejecting load tenders, updating shipment status, and more.

2 You have a TMS but must map your data to match customer specifications. Use Tranztec's desktop or cloud-based software as the ultimate DIY kit. Save money by setting up EDI and other data exchanges with your resources.

3 You need a partner who can scale up or down as needed to meet your customer EDI requirements and more. Tranztec's cloud-based technology and on-demand support are foundational hubs for your connectivity and system integration needs.

Tranztec connectivity solutions enable companies of any size to seamlessly connect with trading partners and exchange data in any format to increase:

Speed
Set up EDI with customers quickly.

Visibility
Seamlessly manage customer communications and load details.

Automation
Fill process gaps and maximize efficiency.

"We were looking for a company that wanted to partner with its customers. Tranztec had the technical and transportation knowledge we needed and a platform we could grow with. Things have gone very well since we started working with them."

Joanna Chicoine
IT Director
AFC Transport, Gary, IN

Tranztec's cost-saving connectivity solutions are custom-fit for companies of any size.
